

 ACURA

**One thing you need  
to know about the RDX,  
you can't see**

### **Mobil 1 5W-30**

#### **New Car Formula**

- Engineered to help keep your engine running like new.
- Best selling Mobil 1 viscosity.
- Energy conserving formula that exceeds the industry's toughest standards.

# Why is Mobil 1 the perfect motor oil for turbocharged engines?

Turbocharged engines have unique lubrication demands that require a synthetic motor oil that takes protection to a whole new level. That's why Acura trusts Mobil 1 to provide maximum protection for the high-performance RDX.

- The high-temperature oxidation stability of Mobil 1 makes it perfect for the turbocharged RDX engine.
- Mobil 1 prevents deposits from building on critical turbocharger and engine components – deposits that can lead to reduced performance and eventual failure.
- Mobil 1 provides excellent wear protection, even under the most severe driving conditions.
- Mobil 1 contributes to better fuel economy and lower emissions.

## Mobil 1 Factory-Filled, Number 1 Performance

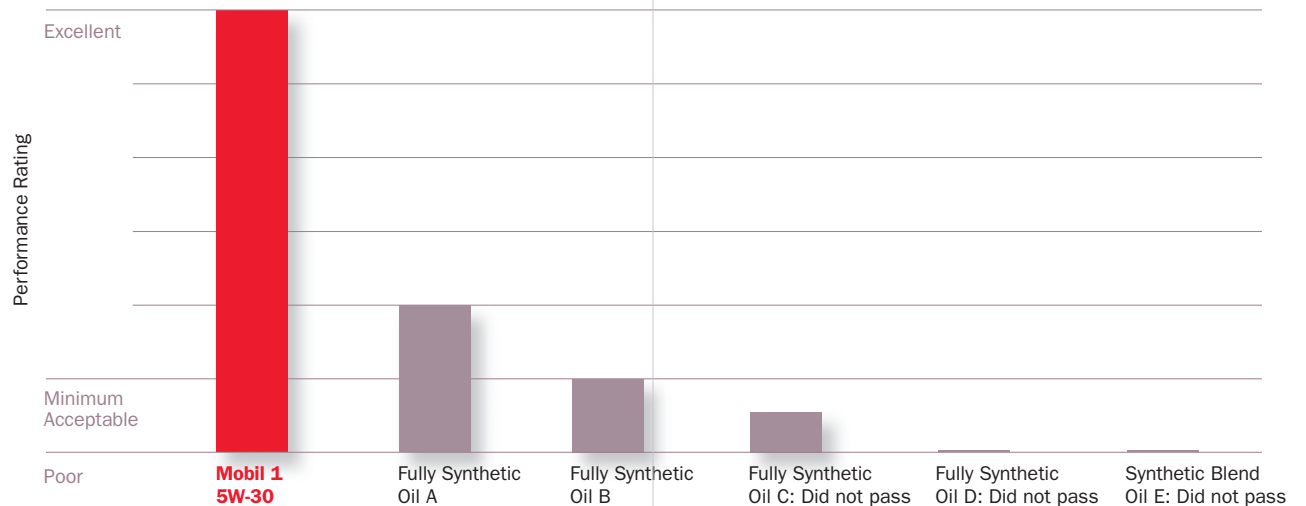

### A Whole New Standard

Your vehicle is equipped with a high-performance, turbocharged engine that requires a synthetic oil that works just as hard as it does. That's why every Acura RDX comes from the factory-filled with Mobil 1® 5W-30 engine oil. Mobil 1 offers excellent wear protection, even under the most severe driving conditions.

Using the right motor oil can enhance the performance and longevity of your vehicle's engine, and better oil means better fuel economy and lower emissions. Because of Acura's commitment to excellence, they developed a tough new standard for motor oil: HTO-06. The HTO-06 standard ensures that the motor oil in every new RDX engine provides maximum protection against additive consumption, sludge content, and turbo deposits.

Leading Synthetic and Blend Engine Oils in the U.S. Marketplace

As the world's leading synthetic motor oil, Mobil 1 outperformed its competitors and received the highest rating of all oils tested. Acura recommends that you always use Mobil 1 5W-30 or an equivalent oil that meets the Acura HTO-06 standard.

### Not All Oils Are Created Equal

Not all synthetic oils meet Acura's HTO-06 standard. In fact, using the wrong oil in a high-performance turbocharged engine leads to accumulated deposits in the engine, which reduces performance and causes engine wear. In exhaustive testing conducted by Acura engineers, Mobil 1 produced no critical deposits on critical engine components such as the seal ring, shaft, and the turbo walls.

To prevent engine damage that may not be covered by your warranty, look for an engine oil that displays Acura's HTO-06 standard on the label.
